

Rick van der Zwet

Innovation by integration

Education

- 2001–current **Computer Science**, *Leiden University*, Leiden.
Bachelor
- 2000–2001 **Electric Engineering**, *TU Delft*, Delft.
- 1995–2001 **VWO**, *Vlietland College*, Leiden.
Profile Natuur & Techniek (Nature & Science)

Experience

Jobs

- 2009–current **System Administrator**, *TransIP B.V.*, Leiden.
I am responsible for IT systems and hardware running FreeBSD for internal use and external use. Also making sure that a 240 racks datacentre is well organised and in control
- 2008–2009 **System Administration Manager**, *Joost Technologies B.V.*, Leiden.
I am responsible for internal facing IT systems and hardware -running various operating systems like FreeBSD, Ubuntu, Windows Server- with primary focus towards the user (employee) improvement, leading a team of 6 people. Using a partial ITIL implementation I managed to get more user satisfaction, with regards to IT systems
- 2006–2008 **System Administrator**, *Joost Technologies B.V.*, Leiden.
I was responsible -together with my colleagues- for the initial setup of Joost internal IT support infrastructure in three offices. My focus was implementing mail & web services running on FreeBSD/Ubuntu servers and network infrastructure. In this position I successfully managed an email migration from Zimbra/Exchange/Courier IMAP into Google Apps
- 2005–2006 **System Administrator**, *Cope IPS*, Leiden.
I was maintaining external facing web services running FreeBSD and responsible for the transition of the business users towards an Exchange 2003 environment. Next I have setup a new build environment for development

Miscellaneous

- 2009 **ITILv2 Foundation**, *EXIN*, Utrecht.

Languages

- | | | |
|---------|------------------|---------------------------------|
| Dutch | excellent | <i>Native language</i> |
| English | good | <i>Joost' official language</i> |
| French | average | <i>Passive (listen/reading)</i> |

Computer skills

Operating Systems	FreeBSD, Ubuntu, Mac OS X, Windows XP/Server	Atlassian	JIRA, Confluence, Crowd
Monitoring Tools	nagios, cacti, opsview	Office Tools	OpenOffice.org, Office 2003, Office 2007
Scripting languages	sh, Perl, Python	Programming languages	C, C++, Java
Mail	qmail, postfix, ezmlm, mailman, spamassassin	Various	isc-bind, isc-dhcp, apache, drupal, trac, moinmoin

Interests

Networks	Networks of any kind has always fascinated me, social networks, wireless networks, all quite different, but fascinating
Running	10km runs
Open Source	Developing software, maintaining projects, providing feedback
Wireless Leiden	I am an active developer (actually also board member) in Stichting Wireless Leiden, a non-profit organization which aims to build an open wireless network covering the city of Leiden and its surrounding using open source software. Running a stable FreeBSD configuration on 80 different hardware systems on hard-to-reach locations is quite a challenge, but it is real fun to get it all going together with many others

Version Control
